

Welcome to the 2004 National ADAP Conference

Ronald Poppel
Bristol-Myers Squibb

Unique opportunity for BMS leadership in HIV

Science

- Promising pipeline
 - may enable us to help redefine future standard of care

Commitment

- Diverse product portfolio
 - only company with key products across all classes
- Expertise, infrastructure and external relationships, reputation

Compassion

- Secure the Future™
- Multiple access programs across the globe

SECURE THE FUTURE™

CD4 Count Testing

Research funded through a SECURE THE FUTURE™ grant has made it possible for many people to monitor their HIV/AIDS condition for a fraction of the cost. Dr. Deborah Glencross worked with partners at the National Health Laboratory Services in South Africa to create a low-cost CD4 test to monitor immune system function and progression of disease in patients with HIV/AIDS.

CD4 Count Testing Benefits

- Reduced costs
- Accuracy
- Longer sample storage
- Easier to use with pediatric samples

Thank You!
